

McGill

Reference #: C-200625

Assistant/Associate Professor (Clinical)

Faculty of Medicine: Gerald Bronfman Department of Oncology, Division of Medical Oncology

Position description

The Gerald Bronfman Department of Oncology, Division of Medical Oncology, McGill University and the Segal Cancer Centre at the Jewish General Hospital invite applications for a full-time position as a member of the Contract Academic Staff as a clinician-scientist at the rank of Assistant Professor or Associate Professor (rank to be determined based on the chosen candidate's experience). This position does not confer eligibility for tenure.

McGill University is a leader in academic medicine, and our educational and research missions support excellent and innovative clinical programs across our teaching hospitals. The Jewish General is one of McGill's major teaching hospitals, located in the vibrant and multicultural city of Montreal, in the province of Quebec, where there are multiple biomedical research facilities and is an international hotspot for AI.

The chosen applicant will be a McGill Faculty member, practice medical oncologist at the Segal Cancer Centre, and will have an appointment at the McGill Centre for Translational Research in Cancer of the Lady Davis Institute for Medical Research. This state of the art biomedical research facility has a vibrant research environment, which has a long history of strong clinician-scientist driven research as well as very strong fundamental discovery science. We have state of the art laboratory and clinical research cores and infrastructure, active training programs in both the clinical and lab-based domains, and the selected candidate will be provided with generous startup support to ensure a successful independent research career.

Job Duties

The chosen candidate will be expected to provide expert clinical care in at least one or several tumor sites or areas of practice including breast cancer, particularly as it relates to emerging treatment, biomarker development, and drug development.

The candidate should be well-trained in Medical Oncology. Ideally, the candidate should have 2-3 years of experience in translational research, with demonstrated strong potential to lead an independent laboratory and associated clinical research program, including publications and participation in obtaining funding. The candidate is expected to apply for peer-reviewed funding for both operations and salary awards.

The candidate is also expected to be actively involved in all aspects of McGill's academic mission (teaching and supervision of clinical trainees and/or graduate students, and involvement in academic and administrative committees) and will be expected to demonstrate a commitment to equity, diversity and inclusion in these activities.

Qualifications and Education requirements

Candidates must hold an MD degree or equivalent, postgraduate clinical training in Internal Medicine and Medical Oncology, with certification by the Collège des médecins du Québec or Royal College of Physicians and Surgeons of Canada (or equivalent). A postgraduate degree (e.g. MSc or PhD) is an asset. The candidate must hold or be eligible for licensure to practice medicine from the Collège des médecins du Québec. All candidates must be fluent in English with a working knowledge of French.

JOB DETAILS

<i>Job Type:</i>	Contract Academic Staff (Clinical)
<i>Rank:</i>	Assistant/Associate Professor
<i>Job status:</i>	Full-time
<i>Salary:</i>	Remuneration will be according to Quebec health care fee schedule

McGill University is committed to equity and diversity within its community and values academic rigour and excellence. We welcome and encourage applications from racialized persons/visible minorities, women, Indigenous persons, persons with disabilities, ethnic minorities, and persons of minority sexual orientations and gender identities, as well as from all qualified candidates with the skills and knowledge to engage productively with diverse communities.

At McGill, research that reflects diverse intellectual traditions, methodologies, and modes of dissemination and translation is valued and encouraged. Candidates are invited to demonstrate their research impact both within and across academic disciplines and in other sectors, such as government, communities, or industry.

McGill further recognizes and fairly considers the impact of leaves (e.g., family care or health-related) that may contribute to career interruptions or slowdowns. Candidates are encouraged to signal any leave that affected productivity, may have had an effect on their career path. This information will be considered to ensure the equitable assessment of the candidate's record.

McGill implements an employment equity program and encourages members of designated equity groups to self-identify. It further seeks to ensure the equitable treatment and full inclusion of persons with disabilities by striving for the implementation of universal design principles transversally, across all facets of the University community, and through [accommodation policies and procedures](#). Persons with disabilities who anticipate needing accommodations for any part of the application process may contact, in confidence, this [email](#) or phone at 514-398-2477.

All qualified applicants are encouraged to apply; however, in accordance with Canadian immigration requirements, Canadians and permanent residents will be given priority.
